

THE QUICK AND EASY WAY TO EMPTY FLOODED BUNKERS

The one thing you can't control is the great British weather!

If you have heavy rain the night before your big tournament, what will your bunkers look like in the morning?

Empty flooded bunkers quickly and effortlessly with the GreenTek Bunker Drainer.

The Bunker Drainer's 5hp Honda engine drives a heavy duty flexible drive shaft, with high volume rotary impeller pump mounted directly on the end of it.

Once started, simply place the pump head in the water. The Bunker Drainer does not require priming which makes it far easier to use than conventional water pumps!
